

Refresher half day or full study day **McKinley T34 Syringe Driver Training**

We have developed a half day refresher workshop for Registered Nurses who have completed the full day McKinley T34 Syringe Driver Training & require a refresher to maintain competence. Or learners can attend the full study day which includes symptom assessment & management.

Refresher half day 2017

Monday 24th April
Wednesday 14th June

Time: 1pm – 4pm

Cost: £80

Venue: All sessions will be at
Cynthia Spencer Hospice
Manfield Health Campus
Kettering Road
Northampton
NN3 6NP

Full study day 2017

Thursday 23rd March
Tuesday 25th April
Monday 15th May
Thursday 29th June

Time: 9.30 – 4pm

Cost: £145

To book please email:
eolceducation@nhft.nhs.uk

Refresher half day Learning Outcomes:

Have the knowledge & understanding of how the McKinley T34 syringe driver is to be used safely & effectively within the clinical area

Demonstrate the skills & knowledge required to safely start up, monitor & close down the device

To understand the importance of communication & shared decision making with patients & their important others, with regards to the use of a syringe driver

Full study day Learning Outcomes:

As above plus:

Explain the relevance of assessment skills with regards to effective symptom management

Discuss the importance of non-pharmacological treatments within symptom management

Apply the concepts of dose titration & calculations to the use of commonly used drugs at the end of life

To recognise & distinguish between commonly used drugs at the end of life that may be used in a syringe driver

If you have any additional learning needs please contact the team on 01604 678153 to discuss.
